MEINBERG

Meinberg Funkuhren GmbH & Co. KG

ACCURATE TIME. WORLDWIDE.

Meinberg offers highly accurate time and frequency references since 1979. Their PZF series represents the only commercially available DCF77 receiver technology using the pseudo random noise sequence for reaching unmatched accuracy based on the PTB's long wave radio signal.

The German company is one of the few producers of GPS radio clock / GPS based frequency standard equipment with own GPS receiver technology and provides time synchronization and reference frequency solutions to customers around the world, including official national time authorities of

several countries, broadcasting and telecommunication infrastructure providers, public authorities, universities, research centers and the international defence sector. The successful LANTIME series of NTP time server appliances offer high quality time synchronization to TCP/IP networks and are used in networks of all sizes around the world.

Contact us for an individual offer or visit us and our partner, UNVERDROSS-TECHNIK, at our booth here at the EFTF 2006.
